

Study of Triangles and Verification of Angle Sum Property

MODEL - AK STVASP

MAKE - AK LABS

The Study of Triangles and Verification of Angle Sum Property Kit is an educational kit designed to demonstrate triangle properties through hands-on activities. It helps students verify the angle sum property and understand geometric relationships using practical learning materials.

KIT DETAILS

The **Study of Triangles and Verification of Angle Sum Property Kit** enables students to explore different types of triangles and verify that the sum of the interior angles of a triangle is **180°** through practical experiments. It strengthens concepts of geometry, angle relationships, and measurement using interactive models and educational tools. Ideal for mathematics laboratories, classrooms, and STEM education.
