

Fractions, Decimals and Percentage Using Manipulative Models

MODEL - AK FDPUMM

MAKE - AK LABS

The Fractions, Decimals and Percentage Using Manipulative Models Kit is an educational kit designed to teach number concepts through hands-on manipulatives. It helps students understand fractions, decimals, percentages, and their relationships using interactive models and practical learning activities.

KIT DETAILS

The **Fractions, Decimals and Percentage Using Manipulative Models Kit** enables students to explore and compare fractions, decimals, and percentages through visual models and activity-based learning. It strengthens numerical understanding, mathematical reasoning, and problem-solving skills by demonstrating equivalent values and conversions. Ideal for mathematics laboratories, classrooms, and STEM education.
