

Study of Human Skeleton and Joints

MODEL - AKBIO008

MAKE - AK LABS

A comprehensive biology lab kit designed for studying the human skeleton and joints. It helps students identify major bones, classify different joint types, understand skeletal functions, and develop practical observation and anatomical knowledge effectively.

KIT SPECIFICATION

Product Code	AK-BIO-008
Product Name	Study of Human Skeleton and Joints Lab Kit
Subject	Biology
Suitable For	Class 9-12
Practical	Study and Identification of Human Skeleton and Joint Types
Application	Schools, Colleges & Biology Laboratories
Packaging	Durable Storage Box with Essential Laboratory Accessories

KIT DETAILS

The **AK Labs Study of Human Skeleton and Joints Lab Kit** helps students identify major bones of the human skeleton and different types of joints, including hinge, ball-and-socket, pivot, and fixed joints. It enhances understanding of skeletal structure, movement, and support while developing observation skills. Suitable for **Class 9-12**, it supports biology practicals in schools, colleges, and laboratories.
