

Verification of Laws of Reflection Using Plane Mirror

MODEL - AKPHY005

MAKE - AK LABS

A comprehensive physics lab kit designed for verifying the laws of reflection using a plane mirror. It helps students observe light reflection, measure angles accurately, and develop practical skills in optics, experimentation, and scientific analysis.

KIT SPECIFICATION

Product Code	AK-PHY-005
Product Name	Verification of Laws of Reflection Using Plane Mirror Lab Kit
Subject	Physics
Suitable For	Class 9-12
Practical	Verification of Laws of Reflection Using Plane Mirror
Application	Schools, Colleges & Physics Laboratories
Packaging	Durable Storage Box with Essential Laboratory Components

KIT DETAILS

The **Verification of Laws of Reflection Using Plane Mirror Kit** provides all essential laboratory equipment required to verify the laws of reflection using a plane mirror. Students perform optical experiments to observe the relationship between the angle of incidence and the angle of reflection while developing practical skills in ray tracing,

measurements, and optical analysis. Ideal for schools, colleges, physics laboratories, and STEM education.
