

Chemical Reactions Kit

MODEL - AKCHEM013

MAKE - AK LABS

The Chemical Reactions Kit is an educational chemistry kit designed to demonstrate different types of chemical reactions. It helps students understand reaction mechanisms, reactants and products, and chemical change through safe, hands-on laboratory experiments.

KIT SPECIFICATION

Kit Name	Chemical Reactions Kit
Subject	Chemistry
Learning Areas	Chemical Reactions, Reaction Types, Reactants & Products, Chemical Changes
Components	Test Tubes, Beakers, Flasks, Droppers, Stirring Rod, Reagents, Chemicals, Safety Equipment
Material	Laboratory Grade Glassware, Chemicals & Durable Educational Equipment
Application	Chemistry Practicals, Reaction Experiments & STEM Education
Suitable For	Schools, Colleges, Chemistry Laboratories, Universities & Educational Institutions

KIT DETAILS

The **Chemical Reactions Kit** provides all essential laboratory equipment required to study and perform various types of chemical reactions. Students observe combination, decomposition, displacement, and double displacement reactions while understanding

reactants, products, and reaction changes. The kit enhances analytical thinking and experimental skills. Ideal for schools, colleges, chemistry laboratories, and STEM-based learning environments.
