

Biochemical Tests Kit

MODEL - AKBIO037

MAKE - AK LABS

The Biochemical Tests Kit is an educational biology kit designed to perform qualitative biochemical tests on biological samples. It helps students understand the identification of carbohydrates, proteins, lipids, enzymes, and other biomolecules through practical laboratory experiments.

KIT SPECIFICATION

Kit Name	Biochemical Tests Kit
Subject	Biology / Biochemistry
Learning Areas	Biochemical Analysis, Carbohydrates, Proteins, Lipids, Enzymes, Biomolecule Identification
Components	Test Tubes, Beakers, Droppers, Reagents, Sample Solutions, Spot Plates, Glass Rod, Measuring Cylinder
Material	Laboratory Grade Glassware, Biochemical Reagents and Analytical Laboratory Equipment
Application	Biology Practicals, Biochemistry Experiments and STEM Education
Suitable For	Schools, Colleges, Biology Laboratories, Universities and Educational Institutions

KIT DETAILS

The **Biochemical Tests Kit** provides all essential laboratory equipment required to perform qualitative biochemical analysis of biological samples. Students conduct tests for

carbohydrates, proteins, lipids, enzymes, and other biomolecules using standard laboratory reagents and techniques. The kit develops analytical skills and strengthens concepts in biochemistry. Ideal for schools, colleges, biology laboratories, and STEM-based learning environments.
