

Permanent Slides Kit

MODEL - AKBIO044

MAKE - AK LABS

The Permanent Slides Kit is an educational biology kit designed to study prepared microscopic specimens. It helps students observe cells, tissues, microorganisms, and biological structures while developing microscopy skills through practical laboratory experiments.

KIT SPECIFICATION

Kit Name	Permanent Slides Kit
Subject	Biology
Learning Areas	Microscopy, Cell Structure, Plant Tissues, Animal Tissues, Microorganisms
Components	Prepared Permanent Slides, Slide Storage Box, Compound Microscope Compatible Slides, Identification Labels, Observation Guide
Material	Laboratory Grade Glass Slides with Professionally Prepared Biological Specimens
Application	Biology Practicals, Microscopy Studies and STEM Education
Suitable For	Schools, Colleges, Biology Laboratories, Universities and Educational Institutions

KIT DETAILS

The **Permanent Slides Kit** provides a collection of high-quality prepared microscope slides for studying plant tissues, animal tissues, microorganisms, and cellular structures.

Students examine preserved specimens under a microscope to understand biological organization and microscopic anatomy. The kit enhances observation skills and practical knowledge in biology. Ideal for schools, colleges, biology laboratories, and STEM-based learning environments.
