

## Primary Numbers Kit

**MODEL** - AKMATH03

**MAKE** - AK LABS

The Primary Numbers Kit is an educational mathematics kit designed to develop early numeracy skills through interactive learning. It helps students understand counting, number recognition, place value, and basic arithmetic using engaging hands-on teaching materials.

### KIT SPECIFICATION

|                |                                                                                                       |
|----------------|-------------------------------------------------------------------------------------------------------|
| Kit Name       | Primary Numbers Kit                                                                                   |
| Subject        | Mathematics                                                                                           |
| Learning Areas | Counting, Number Recognition, Place Value, Addition, Subtraction, Number Patterns                     |
| Components     | Number Cards, Counting Counters, Place Value Blocks, Number Line, Dice, Activity Cards, Teacher Guide |
| Material       | Durable Educational Plastic, Wood and Printed Learning Materials                                      |
| Application    | Mathematics Practicals, Activity-Based Learning and STEM Education                                    |
| Suitable For   | Primary Schools, Mathematics Laboratories, Educational Institutions and Learning Centers              |

### KIT DETAILS

The **Primary Numbers Kit** provides essential learning materials for introducing fundamental number concepts through activity-based education. Students learn counting, number sequencing, place value, addition, subtraction, comparison, and number patterns

using colorful manipulatives and educational tools. The kit strengthens numerical understanding, logical thinking, and problem-solving skills. Ideal for primary schools, mathematics laboratories, and STEM-based learning environments.
