

## HS Physics Lab Kit

**MODEL** - AK HSPLK

**MAKE** - AK LABS

The HS Physics Lab Kit is a comprehensive laboratory solution designed for higher secondary physics practicals. It includes essential instruments and experimental apparatus aligned with curriculum requirements, enabling students to perform accurate experiments in mechanics, optics, electricity, magnetism, heat, and modern physics.

### KIT SPECIFICATION

|                     |                                                              |
|---------------------|--------------------------------------------------------------|
| Kit Type            | Higher Secondary (HS) Physics Lab Kit                        |
| Subject             | Physics                                                      |
| Experiments Covered | Mechanics, Optics, Electricity, Magnetism, Heat & Waves      |
| Components          | Laboratory Instruments, Apparatus & Experimental Accessories |
| Material            | Durable, Laboratory Grade Components                         |
| Application         | Higher Secondary Physics Practicals & Laboratory Activities  |
| Suitable For        | Higher Secondary Schools, Colleges & Physics Laboratories    |

### KIT DETAILS

The **HS Physics Lab Kit** is a complete educational package developed for higher secondary school physics laboratories. It contains high-quality laboratory instruments and experiment kits covering mechanics, optics, electricity, magnetism, heat, waves, and

modern physics. Designed as per educational curriculum standards, it supports hands-on learning, scientific inquiry, and accurate practical experimentation for students and educators.
