

HS Chemistry Lab Kit

MODEL - AK HSCLK

MAKE - AK LABS

The HS Chemistry Lab Kit is a complete laboratory solution designed for higher secondary chemistry practicals. It includes essential glassware, chemicals, laboratory instruments, and experiment accessories, enabling students to perform qualitative, quantitative, and analytical experiments with accuracy and confidence.

KIT SPECIFICATION

Kit Type	Higher Secondary (HS) Chemistry Lab Kit
Subject	Chemistry
Experiments Covered	Inorganic, Organic & Physical Chemistry
Components	Laboratory Glassware, Instruments, Chemicals & Accessories
Material	Laboratory Grade Glassware & Durable Components
Application	Higher Secondary Chemistry Practicals & Laboratory Activities
Suitable For	Higher Secondary Schools, Colleges & Chemistry Laboratories

KIT DETAILS

The **HS Chemistry Lab Kit** is a comprehensive educational package developed for higher secondary chemistry laboratories. It contains laboratory glassware, measuring instruments, chemicals, and essential accessories required for practical experiments in

inorganic, organic, and physical chemistry. Designed as per educational curriculum standards, it promotes hands-on learning, analytical skills, and safe laboratory practices for students and educators.
