

Robotics Kit

MODEL - AK RK

MAKE - AK LABS

The Robotics Kit is a hands-on educational kit designed to teach robotics, coding, electronics, and automation. It enables students to build, program, and test robotic models while developing problem-solving, logical thinking, and engineering skills through interactive STEM learning.

KIT SPECIFICATION

Kit Type	Robotics Kit
Subject	Robotics, Electronics & STEM
Learning Areas	Coding, Automation, Electronics & Robotics
Components	Controllers, Sensors, Motors & Programming Accessories
Material	Durable, Educational Grade Components
Application	Robotics Education, STEM Learning & Practical Projects
Suitable For	Schools, Colleges, ATL Labs & Robotics Clubs

KIT DETAILS

The **Robotics Kit** is a comprehensive learning solution featuring controllers, sensors, motors, electronic modules, and programming accessories for practical robotics education. It helps students explore coding, automation, electronics, and engineering concepts by designing and programming robotic projects. Ideal for schools, colleges, ATL labs, robotics clubs, and STEM education, it promotes innovation and experiential learning.
