

IOT Kit

MODEL - AK IK
MAKE - AK LABS

The IoT Kit is a comprehensive educational kit designed to teach the Internet of Things through hands-on projects. It enables students to build smart devices, connect sensors, collect data, and develop automation skills using programming, electronics, and wireless communication technologies.

KIT SPECIFICATION

Kit Type	Internet of Things (IoT) Kit
Subject	IoT, Electronics & Embedded Systems
Learning Areas	IoT, Programming, Automation & Wireless Communication
Components	Microcontroller, Sensors, Communication Modules & Accessories
Material	Durable, Educational Grade Components
Application	IoT Education, Smart Projects & STEM Learning
Suitable For	Schools, Colleges, STEM Labs, ATL Labs & Innovation Centers

KIT DETAILS

The **IoT Kit** is an all-in-one learning solution featuring microcontrollers, sensors, communication modules, actuators, and programming resources for practical Internet of Things education. It helps students design and develop smart automation projects while learning embedded systems, data monitoring, cloud connectivity, and wireless

communication. Ideal for schools, colleges, STEM labs, ATL labs, and innovation centers.
