

## Geomorphology Kit

**MODEL** - AK GK

**MAKE** - AK LABS

The Geomorphology Kit is a comprehensive educational kit designed to study Earth's landforms and surface processes. It helps students understand erosion, weathering, rivers, glaciers, mountains, valleys, and geological formations through hands-on models, experiments, and practical learning activities.

### KIT SPECIFICATION

|                |                                                                       |
|----------------|-----------------------------------------------------------------------|
| Kit Type       | Geomorphology Kit                                                     |
| Subject        | Geography, Geology & Earth Science                                    |
| Learning Areas | Landforms, Erosion, Weathering, River Systems & Plate Tectonics       |
| Components     | Landform Models, Maps, Geological Specimens & Educational Accessories |
| Material       | Durable, Educational Grade Components                                 |
| Application    | Geography, Geology & Environmental Science Practical Learning         |
| Suitable For   | Schools, Colleges, Geography Labs & Earth Science Laboratories        |

### KIT DETAILS

The **Geomorphology Kit** is an all-in-one learning solution featuring educational models, maps, specimens, and demonstration materials for practical geomorphology studies. It enables students to explore landforms, geological processes, soil erosion, river systems, plate tectonics, and landscape evolution through interactive activities. Ideal for schools,

colleges, geography laboratories, and environmental science education.
