

Latitude and Longitude Kit

MODEL - AK LLT

MAKE - AK LABS

The Latitude and Longitude Kit is a practical educational kit designed to teach geographic coordinates and map-reading skills. It helps students understand latitude, longitude, time zones, hemispheres, and global positioning through interactive models and hands-on learning activities.

KIT SPECIFICATION

Kit Type	Latitude and Longitude Kit
Subject	Geography & Earth Science
Learning Areas	Latitude, Longitude, Time Zones, Hemispheres & Map Reading
Components	Globe, Coordinate Models, Maps & Educational Accessories
Material	Durable, Educational Grade Components
Application	Geography Education, Map Reading & Practical Learning
Suitable For	Schools, Colleges, Geography Labs & Earth Science Laboratories

KIT DETAILS

The **Latitude and Longitude Kit** is a comprehensive learning solution featuring globes, coordinate models, maps, and educational tools for understanding Earth's geographic coordinate system. It enables students to locate places, determine hemispheres, understand time zones, and interpret maps through practical activities. Ideal for schools,

colleges, geography laboratories, and Earth science education.
