

Rock and Mineral Identification Kit

MODEL - AK RMIK

MAKE - AK LABS

The Rock and Mineral Identification Kit is a comprehensive educational kit designed to help students identify and classify rocks and minerals. It supports hands-on learning of geological properties, mineral characteristics, and Earth science concepts through practical observation and testing activities.

KIT SPECIFICATION

Kit Type	Rock and Mineral Identification Kit
Subject	Geology, Geography & Earth Science
Learning Areas	Rock & Mineral Identification, Classification & Physical Properties
Components	Rock & Mineral Specimens, Identification Charts, Testing Tools & Accessories
Material	Natural Specimens with Durable Educational Accessories
Application	Geology, Geography & Earth Science Practical Learning
Suitable For	Schools, Colleges, Geology Labs & Earth Science Laboratories

KIT DETAILS

The **Rock and Mineral Identification Kit** is an all-in-one learning solution featuring carefully selected rock and mineral specimens, identification charts, testing tools, and educational resources. It enables students to study physical properties, classification, hardness, texture, luster, and geological formation processes. Ideal for schools, colleges,

geology laboratories, geography classes, and Earth science education.
