

Earth Interior & Plate Tectonics Kit

MODEL - AK EIPTK

MAKE - AK LABS

The Earth Interior & Plate Tectonics Kit is a comprehensive educational kit designed to explain Earth's internal structure and tectonic processes. It helps students understand crust, mantle, core, plate movements, earthquakes, volcanoes, and continental drift through hands-on models and activities.

KIT SPECIFICATION

Kit Type	Earth Interior & Plate Tectonics Kit
Subject	Geology, Geography & Earth Science
Learning Areas	Earth's Interior, Plate Tectonics, Earthquakes, Volcanoes & Continental Drift
Components	Earth Structure Models, Plate Tectonics Models, Charts & Educational Accessories
Material	Durable, Educational Grade Components
Application	Earth Science, Geography & Geology Practical Learning
Suitable For	Schools, Colleges, Geography Labs & Earth Science Laboratories

KIT DETAILS

The **Earth Interior & Plate Tectonics Kit** is an all-in-one learning solution featuring educational models, diagrams, geological specimens, and activity materials for studying Earth's structure and tectonic processes. It enables students to explore plate boundaries, continental drift, earthquakes, volcanoes, mountain formation, and seismic activity through

practical demonstrations. Ideal for schools, colleges, geography laboratories, and Earth science education.
