

Levelling & Height Measurement Kit

MODEL - AK LHMK

MAKE - AK LABS

The Levelling & Height Measurement Kit is a comprehensive educational kit designed to teach land levelling and height measurement techniques. It enables students to perform elevation surveys, determine height differences, and understand surveying principles through practical field exercises and hands-on learning.

KIT SPECIFICATION

Experiment	Levelling & Height Measurement
Subject	Surveying, Geography & Civil Engineering
Learning Areas	Levelling, Height Measurement, Elevation Survey & Field Survey
Components	Level Instrument, Levelling Staff, Tripod, Measuring Tools & Survey Accessories
Material	Durable, Field & Educational Grade Components
Application	Land Surveying, Geography Practicals & Engineering Education
Suitable For	Schools, Colleges, Geography Labs, Survey Training & Civil Engineering Departments

KIT DETAILS

The **Levelling & Height Measurement Kit** is an all-in-one learning solution featuring levelling instruments, measuring tools, staff, tripods, and surveying accessories for practical education. It helps students determine elevations, measure height differences, establish horizontal planes, and conduct field surveys accurately. Ideal for schools,

colleges, geography laboratories, civil engineering departments, and surveying education.
