

Meter Scale, One Meter, Superior Quality (Wooden)

MODEL - PH-223/B

MAKE - AK LABS

The AK LABS One Meter Wooden Scale is manufactured from superior quality seasoned wood for accurate length measurement. Clearly engraved metric graduations ensure excellent readability, making it ideal for physics laboratories, classrooms, workshops, engineering applications, and educational measurement activities.

PRODUCT SPECIFICATION	
Product Name	Meter Scale (Wooden)
Brand	AK LABS
Length	1 Meter
Material	Superior Quality Seasoned Wood
Graduation	Centimeter & Millimeter Markings
Finish	Smooth Polished Surface
Applications	Measurement & Physics Laboratory Experiments

PRODUCT DETAILS
The AK LABS One Meter Wooden Meter Scale is designed for precision measurement and long-lasting performance. Crafted from premium seasoned hardwood with permanently engraved centimeter and millimeter markings, it provides excellent dimensional accuracy and durability. Its smooth finish, warp-resistant construction, and clear graduations make it suitable for schools, colleges, universities, laboratories, workshops, and engineering

institutes.

Key Features

- Premium quality seasoned wooden construction
- One-meter length with precise metric graduations
- Permanently engraved centimeter and millimeter markings
- Smooth polished finish for comfortable handling
- Warp-resistant and durable design
- High measurement accuracy for laboratory use
- Ideal for schools, colleges, universities, and engineering laboratories

Applications

- Physics Laboratory Experiments
- General Length Measurement
- Classroom Demonstrations
- Engineering Workshops
- Science Practical Activities
- Educational Institutions
- Technical Training Laboratories
