

Meter Scale, Half Meter, Superior Quality (Wooden)

MODEL - PH-223/D

MAKE - AK LABS

The AK LABS Half Meter Wooden Scale is crafted from superior quality seasoned wood for precise length measurement. Featuring clear metric graduations and a smooth polished finish, it is ideal for classrooms, physics laboratories, workshops, engineering applications, and everyday educational use.

PRODUCT SPECIFICATION

Product Name	Meter Scale (Wooden)
Brand	AK LABS
Length	50 cm (Half Meter)
Material	Superior Quality Seasoned Wood
Graduation	Centimeter & Millimeter Markings
Finish	Smooth Polished Surface
Applications	Measurement & Physics Laboratory Experiments

PRODUCT DETAILS

The AK LABS Half Meter Wooden Meter Scale is designed for accurate measurement and long-lasting durability. Manufactured from premium seasoned hardwood with permanently engraved centimeter and millimeter graduations, it provides reliable dimensional accuracy. Its smooth finish and sturdy construction make it suitable for schools, colleges, universities, laboratories, workshops, and engineering institutes for daily practical and

measurement activities.

Key Features

- Manufactured from premium quality seasoned wood
- Half-meter length with accurate metric graduations
- Clearly engraved centimeter and millimeter markings
- Smooth polished surface for comfortable handling
- Durable, warp-resistant construction
- High measurement accuracy for educational use
- Ideal for schools, colleges, universities, and laboratories

Applications

- Physics Laboratory Experiments
- Classroom Measurement Activities
- General Length Measurement
- Engineering Workshops
- Science Practical Demonstrations
- Technical Training Institutes
- Educational Institutions
