

Weight Box (Physical) Brass C.P. (1 g to 200 g)

MODEL - PH-371/C
MAKE - AK LABS

The AK LABS Physical Weight Box contains precision brass chrome-plated weights ranging from 1 g to 200 g, neatly arranged in a durable wooden storage box. Designed for accurate mass measurement and laboratory experiments, it is ideal for schools, colleges, and physics laboratories.

PRODUCT SPECIFICATION	
Product Name	Physical Weight Box
Weight Range	1 g to 200 g
Material	Brass, Chrome Plated (C.P.)
Storage Box	Polished Wooden Box
Accessories	Forceps Included
Application	Mass Measurement & Balance Calibration

PRODUCT DETAILS
The AK LABS Physical Weight Box is manufactured using high-quality brass with a corrosion-resistant chrome-plated finish to ensure long-lasting accuracy and durability. Supplied in a polished wooden storage box with forceps for safe handling, it contains standard metric weights from 1 g to 200 g. Suitable for physics practicals, balance calibration, and precision mass measurement in educational laboratories. Key Features

- Precision brass chrome-plated weights
- Standard weight range from 1 g to 200 g
- Supplied in a durable polished wooden box
- Corrosion-resistant finish for long service life
- Easy identification of individual weights
- Includes forceps for safe handling
- High dimensional and weight accuracy
- Suitable for laboratory balances
- Durable construction for repeated use

Applications

- Physics Laboratories
- School Science Laboratories
- College & University Laboratories
- Mass Measurement Experiments
- Laboratory Balance Calibration
- Practical Science Demonstrations
- Educational Institutions
- Research & Training Laboratories
