

AMMETER (MO-65) Moving Coil

MODEL - PH-001/A

MAKE - AK LABS

DC with Desk stand, Range 0-1, 1.5, 3, 5, 10Amp (Any one range)

PRODUCT SPECIFICATION

PRODUCT DETAILS

AMMETER (MO-65) – AK Labs Make Moving Coil DC Ammeter with Desk Stand

The **AK Labs Make Moving Coil DC Ammeter (MO-65)** is a precision instrument designed for accurate measurement of direct current in educational laboratories, research facilities, and technical institutions. Built with a clear analog display and sturdy desk stand, it ensures reliable performance during practical experiments and demonstrations.

Key Features:

- High-quality Moving Coil DC Ammeter
- Durable AK Labs Make construction
- Large and easy-to-read analog scale
- Supplied with stable desk stand
- Accurate and reliable current measurement
- Ideal for Physics laboratories, schools, colleges, and training institutes
- Robust design for long service life

Available Ranges:

- 0 – 1 Amp
- 0 – 1.5 Amp
- 0 – 3 Amp

- 0 – 5 Amp
- 0 – 10 Amp

Applications:

Suitable for electrical measurements, circuit experiments, educational demonstrations, and laboratory practical work in schools, colleges, universities, and technical institutes.
