

BALANCE PHYSICAL (Cap 250Gm) Original Varanasi (AK Labs Make) 7 Stone, Teak Wood

MODEL - PH-008/C

MAKE - AK LABS

Applies the principle of moments to accurately determine unknown masses in quantitative laboratory experiments.

PRODUCT SPECIFICATION

Product Name	Physical Balance
Capacity	250 g
Weight Set	7 Stone Set
Material	Superior Quality Teak Wood
Type	Double Pan Physical Balance
Construction	Laboratory Grade
Accuracy	High Precision for Educational Use
Application	Mass Measurement & Laboratory Experiments
Suitable For	Schools, Colleges & Science Laboratories

PRODUCT DETAILS

BALANCE PHYSICAL (Capacity 250 g), 7 Stone, Teak Wood, Superior Quality

The **Physical Balance (250 g Capacity, 7 Stone Set)** is a high-quality laboratory weighing instrument designed for accurate mass measurement in physics and science laboratories. Crafted from premium teak wood and supplied with a complete set of standard weights, it is ideal for educational experiments, demonstrations, and practical applications in schools and colleges.

Key Features

- Capacity up to 250 g.
- Supplied with 7 standard weighing stones.
- Premium teak wood construction for durability.
- Precision beam with sensitive balancing mechanism.
- Easy-to-read graduated scale.
- Stable base for accurate measurements.
- Suitable for laboratory and educational use.
- Superior quality finish and workmanship.

Applications

- Physics laboratory experiments
- Measurement of mass and weight
- Educational demonstrations
- Science practical activities
- Laboratory training and research work
