

Projection Microscope With 6" Dome

MODEL - BI-063

MAKE - AK LABS

Projection Microscope with 6" Dome is designed for effective classroom demonstrations, projecting enlarged microscopic images for group observation. Ideal for schools, colleges, and science laboratories to enhance practical learning.

PRODUCT SPECIFICATION

Projection Dome	6-inch high-quality projection dome
Optical System	Precision optical lenses for clear image projection
Application	Classroom demonstrations, laboratory teaching, and group observations
Image Quality	Bright, sharp, and enlarged specimen projection
Construction	Durable metal body with stable base
Suitable For	Schools, Colleges, Universities, and Science Laboratories
Usage	Biology, Microbiology, General Science, and Educational Demonstrations

PRODUCT DETAILS

Built with precision optics and a durable 6-inch projection dome, this microscope delivers bright, sharp images for interactive teaching, improving student understanding during biology and general science practical sessions.
