

Solid State Potentiometer

MODEL - AK B0001
MAKE - AK LABS

Solid State Potentiometer Trainer is an educational instrument designed for practical electronics experiments, helping students understand potentiometer principles, circuit analysis, error detection, and measurement techniques through hands-on learning.

PRODUCT SPECIFICATION	
Trainer Type	Solid State Potentiometer Trainer Module
Display	Digital display for clear readings
Circuit Diagram	Printed circuit diagram on front panel
Controls	Precision rotary potentiometer knobs
Power Supply	External power supply operation
Construction	Durable metal and high-quality plastic enclosure
Applications	Electronics laboratories, engineering colleges, technical institutes, and educational training

PRODUCT DETAILS
Featuring a printed circuit diagram, digital display, rotary controls, and external power supply, this compact trainer offers reliable performance for electronics laboratories, engineering institutes, and technical education programs.
