

Microprocessor Based pH Meter (Table Top)

MODEL - AK B0002

MAKE - AK LABS

Microprocessor Based pH Meter accurately measures pH values in aqueous solutions with high precision. Ideal for laboratories, educational institutions, research centers, and quality control testing applications.

PRODUCT SPECIFICATION

Model	AK-107 Microprocessor pH mV Temp Meter
pH Range	0 to 14 pH
Accuracy & Resolution	±0.01 pH Accuracy, 0.01 pH Resolution
Display	16 × 2 Alphanumeric LCD Display
Calibration	3-Point Calibration
Electrode	Combined pH Electrode
Application	Laboratory analysis, educational institutes, research laboratories, and aqueous solution testing

PRODUCT DETAILS

Featuring a 16×2 alphanumeric LCD, 3-point calibration, combined pH electrode, and ±0.01 pH accuracy, this tabletop digital meter ensures reliable, consistent, and user-friendly pH measurements.
