

Magnetic Stirrer (Without Heating)

MODEL - AK B0003

MAKE - AK LABS

Magnetic Stirrer without Heating is designed for smooth and uniform mixing of liquid solutions in laboratories. It provides reliable stirring performance for chemical, biological, pharmaceutical, and educational applications without altering sample temperature during operation.

PRODUCT SPECIFICATION

Product Type	Magnetic Stirrer (Without Heating)
Operation	Variable speed magnetic stirring
Top Plate	Chemical-resistant and corrosion-resistant surface
Speed Control	Adjustable rotary speed control
Motor	Quiet and maintenance-free motor
Applications	Chemical, Biological, Pharmaceutical & Educational Laboratories
Suitable For	Schools, Colleges, Universities, Research & QC Laboratories

PRODUCT DETAILS

Featuring adjustable stirring speed, a durable corrosion-resistant top plate, and quiet motor operation, this magnetic stirrer ensures efficient and consistent solution mixing. It is suitable for laboratories, research institutes, quality control facilities, and educational science experiments.
