

Magnetic Stirrer with Heating

MODEL - AK B0004

MAKE - AK LABS

Magnetic Stirrer with Heating combines efficient liquid mixing and controlled heating in a single compact unit. It is ideal for chemical, biological, pharmaceutical, and research laboratories requiring uniform stirring and precise temperature control during experiments.

PRODUCT SPECIFICATION

Product Type	Magnetic Stirrer with Heating
Heating Function	Adjustable temperature control for uniform heating
Stirring Control	Variable speed magnetic stirring
Top Plate	Chemical-resistant and corrosion-resistant surface
Motor	Quiet, maintenance-free, high-performance motor
Applications	Chemical, Biological, Pharmaceutical & Research Laboratories
Suitable For	Schools, Colleges, Universities, R&D and Quality Control Laboratories

PRODUCT DETAILS

Designed with adjustable stirring speed and heating controls, this laboratory instrument provides consistent mixing and uniform heat distribution. Its durable, chemical-resistant top plate and reliable performance make it suitable for routine laboratory analysis, sample preparation, and research applications.
