

Microscope LED Light (Pin Type)

MODEL - BI-054/A

MAKE - AK LABS

The AK LABS Microscope LED Light (Pin Type) is a compact illumination unit designed to provide bright, uniform lighting for microscope observations. Featuring energy-efficient LED technology, adjustable brightness, and easy pin-type installation, it is ideal for school, college, laboratory, and research microscopes.

PRODUCT SPECIFICATION

Product Type	Microscope LED Light (Pin Type)
Light Source	High-Brightness LED
Mounting Type	Pin Type Illuminator
Brightness Control	Adjustable Intensity Control
Brightness	Uniform and stable illumination
Power Switch	Built-in ON/OFF Switch
Suitable For	Educational, Research, Clinical & Laboratory Microscopes

PRODUCT DETAILS

The AK LABS Microscope LED Light (Pin Type) is an efficient replacement for conventional microscope illuminators. It delivers bright, cool, and consistent LED illumination for clear specimen viewing while consuming minimal power. Its compact body, pin-type mounting, built-in ON/OFF switch, and adjustable light intensity make it suitable for educational laboratories, biological studies, and routine microscopic observations.

Key Features

- High-intensity white LED illumination
- Energy-efficient and long service life
- Adjustable brightness control
- Compact lightweight design
- Pin-type fitting for easy installation
- Low heat generation for continuous use
- Ideal for educational and laboratory microscopes.

Applications

- Biological microscope illumination
- Educational laboratory practicals
- School and college science laboratories
- Medical laboratory training
- Routine microscopic observation
- Research laboratory applications
- Replacement microscope light source
