

Screw Gauge (Micrometer) 25 mm All Brass

MODEL - PH-299/G

MAKE - AK LABS

Screw Gauge (Micrometer) 25 mm is a precision measuring instrument designed for accurate measurement of small dimensions and thickness. Made from high-quality brass, it is ideal for physics laboratories, engineering workshops, and educational applications.

PRODUCT SPECIFICATION

Product Type	Screw Gauge (Micrometer)
Measuring Range	0-25 mm
Material	High-Quality All Brass
Least Count	0.01 mm
Operation	Precision screw mechanism with smooth spindle movement
Applications	Thickness and small dimension measurement
Suitable For	Schools, Colleges, Universities, Engineering & Physics Laboratories

PRODUCT DETAILS

Manufactured with durable all-brass construction, this 25 mm micrometer provides smooth spindle movement and precise readings for reliable measurements. It is suitable for schools, colleges, universities, technical institutes, and research laboratories requiring high measurement accuracy.
