

Plug Key Two Way with ½" Brass Block

MODEL - PH-260/D

MAKE - AK LABS

Plug Key Two Way with ½-inch brass block is a durable electrical switching device designed for selecting and controlling two circuit paths during laboratory experiments. It ensures reliable electrical contact, smooth operation, and accurate results in physics practical applications.

PRODUCT SPECIFICATION

Product Type	Two Way Plug Key
Contact Material	½ inch Solid Brass Blocks
Base Material	Heavy-Duty Insulated Base
Operation	Two Way Manual Circuit Switching
Conductivity	Low Contact Resistance with Reliable Electrical Connection
Applications	Electrical Circuit Selection, Physics Practical & Laboratory Experiments
Suitable For	Schools, Colleges, Universities & Physics Laboratories

PRODUCT DETAILS

Manufactured with heavy-duty ½-inch solid brass blocks mounted on a robust insulated base, this two-way plug key provides excellent conductivity, low contact resistance, and long service life. It is ideal for electrical experiments, physics laboratories, and educational institutions.
