

Micrometer (Screw Gauge) All Brass

MAKE - AK LABS

AK Labs 25 mm All Brass Screw Gauge is a precision micrometer designed for accurate measurement of wire diameter, sheet thickness, and small machine components. Manufactured from solid brass with fine graduations, it delivers dependable accuracy for laboratory, educational, and industrial applications.

PRODUCT SPECIFICATION

PRODUCT DETAILS

The AK Labs 25 mm All Brass Screw Gauge (Micrometer) is crafted from premium-quality brass to provide excellent durability, corrosion resistance, and smooth spindle movement. With a **least count of 0.01 mm (1/100 mm)**, it ensures precise external measurements of small objects. Ideal for physics laboratories, engineering workshops, quality inspection, schools, colleges, and scientific research.

Key Features

- Premium all-brass body for superior durability
- Precision measuring range up to **25 mm**
- Least count of **0.01 mm** for accurate readings
- Smooth spindle and ratchet mechanism
- Corrosion-resistant polished brass finish
- Clear engraved graduations for easy reading
- Supplied in a protective storage case for safe handling and storage
