

Weight Box (Physical)

MODEL - PH-371

MAKE - AK LABS

AK Labs Physical Weight Box is a precision laboratory weight set designed for balance experiments, mass measurement, and calibration. Available in Iron Chrome Plated and Brass Chrome Plated variants, it is supplied in a durable wooden storage box for safe handling and long service life.

PRODUCT SPECIFICATION

PRODUCT DETAILS

The AK Labs Physical Weight Box contains accurately machined standard weights for laboratory experiments and precision mass measurement. Housed in a polished wooden case with forceps, it ensures safe storage and convenient handling. Available in Iron Chrome Plated and Brass Chrome Plated versions with capacities up to 200 g, it is ideal for physics laboratories, schools, colleges, engineering institutes, and research laboratories.

Key Features

- Precision-machined standard laboratory weights
- Available in Iron Chrome Plated and Brass Chrome Plated options
- Durable polished wooden storage case
- Includes precision forceps for safe handling
- Corrosion-resistant finish for long service life
- Suitable for balance calibration and mass measurement experiments
